

Test Case for Login Page

TC_ID	Test Scenario	Test Case	Preconditions	Test Steps	Test Data	Expected Result	Priority
Tc_01	Valid Login	Verify login with valid username & password	User is on Login Page	1.Enter Valid username 2.Enter valid Password 3.Click Login page.	Valid Credentials	User should Successfully log in and be redirected to the dashboard/home page	High
Tc_02	Invalid User	Verify login with invalid username & password	User is on Login Page	1.Enter Invalid username 2.Enter valid Password 3.Click Login page.	invalid user/ valid password	Appopriate error message should be display.	High
Tc_03	Invalid Password	Verify login with valid username & invalid password	User is on Login Page	1.Enter Valid username 2.Enter invalid Password 3.Click Login page.	Valid user/ invalid password	Appopriate error message should be display.	High
Tc_04	Both Invalid	Verify login with invalid username & password	User is on Login Page	1.Enter inavid username 2.Enter invalid Password 3.Click Login page.	Invalid user/ password	Appopriate error message should be display.	High
Tc_05	Empty User	Verify login with Empty Empty User name	User is on Login Page	1.Enter Empty username 2.Enter valid Password 3.Click Login page.	Empty User/ valid passwrod	Appopriate error message should be display.	High
Tc_06	Empty Pssword	Verify login with Empty Empty Password	User is on Login Page	1.Enter Valid username 2.Enter Empty Password 3.Click Login page.	Valid User/ empty passwrod	Appopriate error message should be display.	High
Tc_07	Both Empty	Verify login with Empty Empty Password	User is on Login Page	1.Enter Empty username 2.Enter Empty Password 3.Click Login page.	Both field empty	Field is Required validation messages should be displayed	High
Tc_08	Password Masking	Verif that password is masked	User is on Login Page	1.Enter password in password field	admin@123	Password should be displayed as masked characters.	Medium
Tc_09	Show / Hide Password	Verify show hide functionality	User is on Login Page	1.Enter password in password field 2.Click Show/Hide icon.	admin@124	Password visibility should change correctly	Medium
Tc_10	Uername Space	Verify login behavior with leading/trailing space in username	User is on Login Page	1.Enter username with space. 2.Enter valid Password 3.Click Login page.	username	Application should handle spaces according to requirements	Medium
Tc_11	Forgot Button	Verify Forgot password Link	User is on Login Page	1.Click Forgot Password	N/A	User Should be redirected to password recoverypage	Medium
Tc_12	Remember Me	Verify Remember me Functionality	User is on Login Page	1.Enter Valid credential. 2.Select Remember Me 3.Login 4.Close and repen brower.	Valid credentials	User session/username should be remembered according to requirements	Medium
Tc_13	Login Button	Verify login button Functionality	User is on Login Page	1.Enter Valid Credential. 2.Click Login button.	Valid credentials	Login button should submit credintials and authenticate the user	High
Tc_14	Enter Key log in	Verify Using Enter key	User is on Login Page	1.Enter Username 2.Enter Password. 3.Click Enter.	Valid credentials	Enter key should submit credintials and authenticate the user	High
Tc_15	Multiple Failed Attempts	Verify behavior after multiple failed login attempts	User is on Login Page	1.Enter incorrect credentials repeatedly	Inalid credentials	Account should be handled according to security requirements, such as temporary lockout or CAPTCHA	High
Tc_16	SQL Injection	Verify login fields against SQL injection input	User is on Login Page	1.Enter malicious SQL-like input in username/Password. 2.Click Login.	SQL injection Test input.	Application should reject the input and should not authenticate the user	High
Tc_17	UI Alignment	Verify login page UI elements	User is on Login Page	1.Obser username & Password Field. 2.Log in Button. 3.Links & Labels.	N/A	All elements should be properly aligned and visible	Low
Tc_18	Error Message UI	Verify Error Message appearance	User is on Login Page	1.Enter Invalid Credential. 2.Click Login	N/A	Error message should be clear, readable, and displayed in the correct location	Medium

Test case for Check Box

TC_ID	Test Case	Test Steps	Test Data	Expected Result	Priority
TC_01	Verify checkbox is displayed	Open the form	N/A	Checkbox should be visible	High
TC_02	Verify checkbox label	Open the form	N/A	Correct label should be displayed beside the checkbox	Medium
TC_03	Verify checkbox default state	Open the form	N/A	Checkbox should have the expected default state	High
TC_04	Select checkbox	Click an unchecked checkbox	N/A	Checkbox should become checked	High
TC_05	Unselect checkbox	Click a checked checkbox	N/A	Checkbox should become unchecked	High
TC_06	Select multiple checkboxes	Select multiple checkboxes	Option A, B, C	All independent checkboxes should be selectable	High
TC_07	Verify independent selection	Select one checkbox	Option A	Other independent checkboxes should remain unchanged	High
TC_08	Verify required checkbox	Leave required checkbox unchecked and submit	Blank	Appropriate validation message should appear	High
TC_09	Submit with checkbox selected	Select required checkbox and submit	Checked	Form should be submitted successfully	High
TC_10	Verify checkbox keyboard operation	Focus checkbox using Tab and press Space	N/A	Checkbox should toggle correctly	Medium
TC_11	Verify checkbox Tab navigation	Navigate using Tab	N/A	Checkbox should receive focus in correct order	Medium
TC_12	Verify checkbox focus indicator	Focus checkbox using keyboard	N/A	Visible focus indicator should appear	Medium
TC_13	Verify disabled checkbox	Open page with disabled checkbox	N/A	Disabled checkbox should not be selectable	High
TC_14	Verify enabled checkbox	Open page with enabled checkbox	N/A	User should be able to select/unselect it	High
TC_15	Verify Select All checkbox	Click Select All checkbox	All options	All applicable checkboxes should become selected	High
TC_16	Verify Deselect All checkbox	Click Select All again	All options	All applicable checkboxes should become unchecked	High
TC_17	Verify partial selection state	Select some options when Select All exists	Option A, B	Select All should show appropriate indeterminate state if designed	Medium
TC_18	Verify checkbox after page refresh	Select checkbox and refresh page	Checked	State should persist or reset according to requirements	Medium
TC_19	Verify checkbox after form reset	Select checkbox and click Reset	Checked	Checkbox should return to expected default state	Medium
TC_20	Verify checkbox on mobile	Open form on mobile/responsive view	Mobile	Checkbox should be visible and easy to select	Medium

Test Case for Radio Button

TC_ID	Test Case	Test Steps	Test Data	Expected Result	Priority
TC_01	Verify radio buttons are displayed	Open the form	N/A	Radio buttons should be visible	High
TC_02	Verify radio button labels	Open the form	N/A	Correct labels should be displayed	Medium
TC_03	Verify default selection	Open the form	N/A	Expected default option should be selected if specified	High
TC_04	Select a radio button	Click an unselected option	Option A	Selected radio button should become active	High
TC_05	Verify only one option can be selected	Select Option A, then Option B	A → B	Option A should become unselected when Option B is selected	High
TC_06	Switch between radio options	Select different options sequentially	A → B → C	Only the latest selected option should remain selected	High
TC_07	Verify required radio group	Leave all options unselected and submit	None	Appropriate validation should appear	High
TC_08	Submit with valid selection	Select a valid option and submit	Option A	Form should be submitted successfully	High
TC_09	Verify keyboard navigation	Focus radio group and use arrow keys	A/B/C	User should be able to navigate/select according to accessibility requirements	High
TC_10	Verify Tab navigation	Navigate using Tab	N/A	Radio group should receive focus correctly	Medium
TC_11	Verify disabled radio button	Open page with disabled option	Option A	Disabled option should not be selectable	High
TC_12	Verify enabled radio button	Click enabled option	Option B	Option should become selected	High
TC_13	Verify radio button group behavior	Select an option in one group	Group A	Selection should not affect a separate radio group	High
TC_14	Verify radio button after form reset	Select an option and click Reset	Option B	Radio selection should return to expected default state	Medium
TC_15	Verify radio button after page refresh	Select an option and refresh	Option B	State should persist or reset according to requirements	Medium
TC_16	Verify radio button labels are clickable	Click the label instead of the radio button	Option A label	Corresponding radio button should become selected	Medium
TC_17	Verify radio button focus indicator	Navigate to radio button using keyboard	N/A	Visible focus indicator should appear	Medium
TC_18	Verify radio button on mobile	Open form on mobile/responsive view	Mobile	Radio buttons should be visible and easy to select	Medium
TC_19	Verify selection with invalid form data	Select radio option and submit invalid form	Option A + invalid data	Radio selection should remain while other validation errors are displayed	Medium
TC_20	Verify radio button accessibility	Navigate and operate using keyboard/assistive technology	N/A	Radio group should have appropriate labels, semantics, and keyboard behavior	High

Test case for Forgot Password

TC_ID	Test Scenaril	Preconditions	Test Steps	Test Data	Expected Result	Priority
Tc_01	Verify Forgot Password link is displayed	Into the login page	1.Open Login page	N/A	Forgot Password link should be visible	High
Tc_02	Verify Forgot Password navigation	Into the login page	1.Click Forgot Password	N/A	User should be redirected to Forgot Password page	High
Tc_03	Verify Forgot Password page UI	Into the login page	1.Open Forgot Password page	N/A	Required fields, buttons, labels and instructions should be displayed correctly	Medium
Tc_04	Submit empty email/username	Into the login page	1.Leave field empty and click Submit	Blank	Required-field validation should appear	High
Tc_05	Enter valid registered email	into the forgot password form	1.Enter registered email and submit	abc@gmail.com	Password reset process should be initiated	High
Tc_06	Enter unregistered email	into the forgot password form	1.Enter an email that is not registered	xyz@gmail.com	Appropriate response should be displayed according to security requirements	High
Tc_07	Enter invalid email format	into the forgot password form	1.Enter invalid email	abc@	Email format validation should appear	High
Tc_08	Enter email without @	into the forgot password form	1.Enter invalid email	invalidemail.com	Validation message should be displayed	High
Tc_09	Enter email without domain	into the forgot password form	1.Enter invalid email	abc@.com	Validation message should be displayed	Medium
Tc_10	Enter email with leading/trailing spaces	into the forgot password form	1.Enter email with spaces	ab@example.com	System should handle spaces appropriately	Medium
Tc_11	Verify reset email is sent	into the forgot password form	1.Submit registered email	Registered email	Password reset email should be sent successfully	High
Tc_12	Verify reset link	into the mail	1.Open password reset email and click reset link	Valid reset link	User should be redirected to password reset page	High
Tc_13	Verify reset page expiration	into the mail	1.Open an expired reset link	Expired token	System should reject the link and show an appropriate message	High
Tc_14	Verify reset link reuse	into the mail	1.Use the same reset link again after password reset	Used token	System should reject an invalid/used token if one-time use is required	High
Tc_15	Reset password with valid new password	into the reset link	1.Enter valid new password and confirmation	Admin@123	Password should be successfully reset	High
Tc_16	New password and confirmation mismatch	into the reset link	1.Enter different passwords	Abc@12345 / Abc@12346	Validation message should be displayed	High
Tc_17	New password left blank	into the reset link	1.Leave new password empty	Blank	Required-field validation should appear	High
Tc_18	Confirm password left blank	into the reset link	1.Leave confirmation empty	Blank	Required-field validation should appear	High
Tc_19	Verify password policy during reset	into the reset link	1.Enter password that violates policy	123	Password policy validation should be displayed	High
Tc_20	Login with new password	into the reset link	1.Reset password, then return to Login	New password	User should be able to log in using the new password	High
Tc_21	Verify old password no longer works	into the reset link	1.Reset password, then try old password	Old password	Old password should no longer authenticate the user	High
Tc_22	Verify reset link security	into the reset link	1.Modify/tamper with reset token/link	Modified URL	System should reject the invalid reset request	High
Tc_23	Multiple forgot-password requests	into the reset link	1.Request password reset multiple times	Same email	System should handle multiple requests correctly according to requirements	Medium
Tc_24	Verify reset success message	into the reset link	1.Complete password reset	Valid data	Clear success confirmation should be displayed	Medium
Tc_25	Verify navigation after reset	into the reset link	1.Complete password reset	Valid data	User should be redirected to Login or appropriate page	Medium

Test Case for Text Box

TC ID	Test Case	Test Steps	Test Data	Expected Result	Priority
Tc_01	Verify text box is displayed	Open the form	N/A	Text box should be displayed correctly	High
Tc_02	Verify text box label	Open the form	N/A	Correct label should be displayed	Medium
Tc_03	Verify placeholder text	Open the form	N/A	Correct placeholder should be displayed	Low
Tc_04	Enter valid text	Click text box and enter valid data	John Doe	Text should be entered successfully	High
Tc_05	Verify empty text box	Leave text box empty and submit	Blank	Required-field validation should be displayed if mandatory	High
Tc_06	Enter minimum allowed characters	Enter minimum valid characters	ABC	Data should be accepted according to requirements	Medium
Tc_07	Enter less than minimum characters	Enter fewer than required characters	AB	Appropriate validation message should be displayed	Medium
Tc_08	Enter maximum allowed characters	Enter data up to the maximum limit	50 characters	All allowed characters should be accepted	High
Tc_09	Exceed maximum character limit	Enter more than the allowed characters	51+ characters	Extra characters should be prevented or validation should appear	High
Tc_10	Enter special characters	Enter special characters	@#\$%&*	System should handle characters according to requirements	Medium
Tc_11	Enter numeric values	Enter numbers	123456	Numbers should be accepted/rejected according to field requirements	Medium
Tc_12	Enter alphanumeric values	Enter letters and numbers	John123	Data should be handled according to requirements	Medium
Tc_13	Enter spaces	Enter spaces between words	John Doe	Spaces should be accepted where applicable	Medium
Tc_14	Enter only spaces	Enter only spaces		System should reject the input if blank/whitespace is not valid	High
Tc_15	Enter leading spaces	Enter spaces before text	John	System should trim or handle leading spaces according to requirements	Medium
Tc_16	Enter trailing spaces	Enter spaces after text	John	System should trim or handle trailing spaces according to requirements	Medium
Tc_17	Verify copy and paste	Copy text and paste into text box	John Doe	Text should be pasted successfully if paste is allowed	Low
Tc_18	Verify cut operation	Enter text and use Cut	John Doe	Selected text should be removed successfully	Low
Tc_19	Verify clear operation	Enter text and clear the field	John Doe	Text box should become empty	Medium
Tc_20	Verify keyboard input	Enter text using keyboard	Test123	Characters should appear correctly	Medium
Tc_21	Verify Tab navigation	Use Tab key from previous field	N/A	Cursor should move to the text box in the correct order	Medium
Tc_22	Verify text box focus	Click inside the text box	N/A	Text box should receive focus and indicate active state	Medium
Tc_23	Verify cursor position	Click at different positions inside entered text	John Doe	Cursor should appear at the selected position	Low
Tc_24	Verify editable text	Enter text and modify it	John Doe → John Smith	User should be able to edit the entered text	High
Tc_25	Verify required-field indicator	Open form	N/A	Required indicator such as * should be displayed if applicable	Medium
Tc_26	Submit invalid input	Enter invalid data and submit	Invalid data	Appropriate validation message should be displayed	High
Tc_27	Verify validation message placement	Trigger validation	Invalid data	Validation message should appear near the relevant text box	Medium
Tc_28	Verify validation message disappears	Enter invalid data, then correct it	AB → John	Validation message should disappear after valid input	Medium
Tc_29	Verify text box after form reset	Enter text and click Reset/Clear	John Doe	Text box should return to its default/empty state	Medium
Tc_30	Verify text persistence	Enter text and navigate as permitted	John Doe	Text should persist or clear according to requirements	Low
Tc_31	Verify HTML/script input handling	Enter potentially unsafe text	<script>	Application should safely handle the input and prevent unintended script execution	High
Tc_33	Verify very long input	Paste a very large amount of text	Large text	Application should remain responsive and enforce the defined limit	Medium
Tc_34	Verify text box alignment	Open the form	N/A	Text, label, and box should be properly aligned	Low
Tc_35	Verify text box responsiveness	Open form on different screen sizes	Desktop/Mobile/Tablet	Text box should display and function correctly across supported devices	Medium
